HOOD

Hood's 'Squeeza' makes light work of handling your Hood light air sails - MP-S, MP-G, cruising spinnaker - or any other make of sail, for that matter. Its ingenious design gives you perfect set every time. Dousing is quick and trouble-free, too. No more sails dragging in the water. And no more blind struggles with yards of billowing sailcloth. When the sail isn't needed, the 'Squeeza' Stows it neatly and compactly, ready for instant use.

Efficient, reliable operation makes using your big, light air sails even more of a pleasure. The Hood 'Squeeza' couldn't be easier to use, as the diagrams show.

1 Packed and ready...

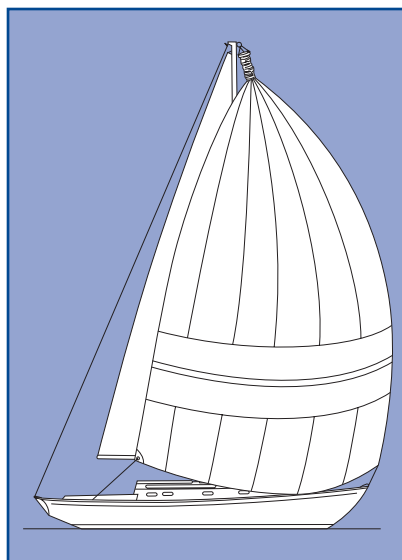

2 A perfect set every time.

1 Pack your Hood MP-S, MP-G or cruising spinnaker into the 'Squeeza' simply by pulling the head through its length. Raise the loaded 'Squeeza' to the masthead on a genoa or spinnaker halyard and it's ready for use.

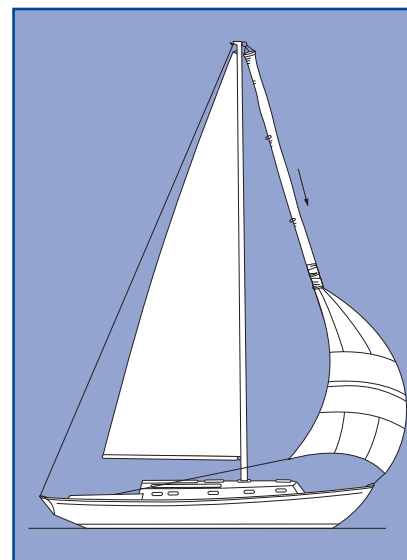

2 Pull the 'Squeeza' cord and watch your sail blossom perfectly, easily, every time.

3 While sailing, the 'Squeeza' is at the masthead. Its compact design minimises windage. And it is built of super-light, but extremely tough material for long, trouble-free use.

4 To douse, just east the sheet and pull the 'Squeeza' down over the sail. You have perfect control at every stage. It's as simple as that!

3 The 'Squeeza' is a light and compact at the masthead.

4 It's a perfect takedown every time.

Call your Hood loft today for more details. You'll wonder how you ever did without it.
